## Provincial Survey Renewed Math Strategy

To: Presidents and All Members

From: Harvey Bischof, President

### For Immediate Action

In the spirit of Collaborative Professionalism, organizations and federations representing educators, in partnership with the Ministry of Education, have developed a Renewed Math Strategy Survey to tap into your experience of the implementation the Renewed Mathematics Strategy (RMS) since September 2016.

The survey will be shared widely by all of the survey development collaborators with the hope that educators will participate.

- The Renewed Math Strategy Survey takes approximately 10 to 15 minutes to complete and is open during the month of December 2017.
- Participation is voluntary.
- Individual respondents will remain anonymous. Information will be aggregated and summarized for sharing.
- If you receive multiple invitations to complete the survey, please do so only once.
- The survey will remain open for the month of December.

The data will come back to the working group of organizations and federations representing educators in partnership with the Ministry of Education who designed the survey.

Members are encouraged to participate and to share their experiences regarding the implementation of the Renewed Math Strategy and support provided. Please direct any questions you may have to Rob Dubyk at [rob.dubyk@osstf.ca](mailto:rob.dubyk@osstf.ca).
